## Profile

Experienced Software Engineer with over 8 years of expertise in developing scalable web applications and distributed systems.

Proven track record in architecting robust backend solutions, optimizing cloud infrastructure, and leading cross-functional teams to deliver high-impact projects.

Passionate about clean code, performance optimization, and staying at the forefront of emerging technologies.

## Education

2020 – 2024      **University of Excellence**, B.Sc. in Computer Science (*Cityville, Country*)

2016 – 2020      **Regional High School**, Mathematics and Informatics (*Townsville, Country*)

## Employment History

2022 – present      **Tech Solutions Inc.**, Senior Software Engineer (*Remote*)

- Leading the development of a cloud-native microservices platform using Go and Kubernetes.
- Optimized database performance, reducing query response times by 40% for high-traffic endpoints.
- Mentoring junior developers and establishing code quality standards across the engineering team.
- Architecting scalable APIs for third-party integrations, serving millions of requests daily.
- Implementing CI/CD pipelines to automate deployment processes, improving release frequency.

2019 – 2022      **Innovate Soft**, Full Stack Developer (*Cityville, Country*)

- Developed and maintained responsive web applications using React and Node.js.
- Migrated legacy monolithic applications to modern frontend frameworks, improving user experience.
- Collaborated with UX/UI designers to implement accessible and intuitive user interfaces.
- Managed AWS infrastructure, including EC2, S3, and RDS, ensuring high availability and security.
- Participated in Agile ceremonies and contributed to technical documentation and system design.

## Employment History (continued)

---

2016 – 2019

**Digital Services Agency**, Web Developer (*Townsville, Country*)

- Built custom e-commerce websites and content management systems for various clients.
- Integrated third-party payment gateways and shipping APIs into web platforms.
- Optimized frontend assets for performance, resulting in faster page load times.
- Worked closely with clients to gather requirements and provide technical support.
- Utilized PHP, JavaScript, and MySQL for various web-based projects.

## Awards and Achievements

---

Awarded "Employee of the Year" at Tech Solutions Inc. for leading the migration of critical services to cloud infrastructure, resulting in 30% cost savings.

Winner of the 2021 Global Innovation Hackathon for developing an open-source tool for real-time data visualization of public health metrics.

Regular contributor to several open-source projects focused on improving developer productivity and software quality.

Speaker at various local tech meetups and conferences, sharing insights on microservices architecture and cloud-native development.
